AIR DRYER FILTERS

AUTOMATIC FILTRATION EVOLUTION

AIR DRYER FILTERS

THE RIGHT CARTRIDGES TO MEET YOUR REQUIREMENTS

EXCO cartridge is the first line of defense protecting a vehicle's air system. EXCO cartridges prevent humid air from filtering into the system protecting it from corrosion and freezing. As a result, the entire air system is kept operating safely and at peak performance. Laboratory tests demonstrate the performance superiority of genuine EXCO cartridges compared to the low-cost competition. Choose EXCO cartridges for applications that require exceptional value for money in everyday long-distance driving conditions.

IMPROVED PROTECTION

LONGER SERVICE LIFE

LOWER SERVICE COSTS

EASY TO RETROFIT

AIR DRYER FILTERS

EXCO Filters has a complete line of air dryer filters, including desiccant and desiccant/coalescing versions, to protect your equipment. Air dryer filters are designed to capture moisture and contaminants created and produced by air compressors. Keeping moisture out of the system helps to prevent possible water freezing and also potentially damaging brake valves and other vital parts. Further filtration removes oils and other contaminants, which can damage the brake system.

Desiccants are used to hold water droplets until the brake system reaches full or maximum pressure. The brake system then goes through multiple purge cycles. These purge cycles force the moisture and any contaminants built up from the system.

Desiccant/Coalescing air dryer filters include added coalescing media to re-move excess oil contaminants prior to the desiccants. Removal of oil aerosols prevents contamination of the desiccants, allowing the desiccants to better remove moisture from the system.
